

Learning Tiktok journalism together

Dr Jerome Turner, School of Media
Birmingham City University

Tiktok: @jt1977jt

MED5209 – Disruptive Publishing

- 2nd year module on Journalism BA
- Practice and research based
- 4 portfolio elements: listicles; newsletters; writing for the web; sequential storytelling

2020: Instagram and Snapchat Stories

2021: IG, Snapchat, Tiktok

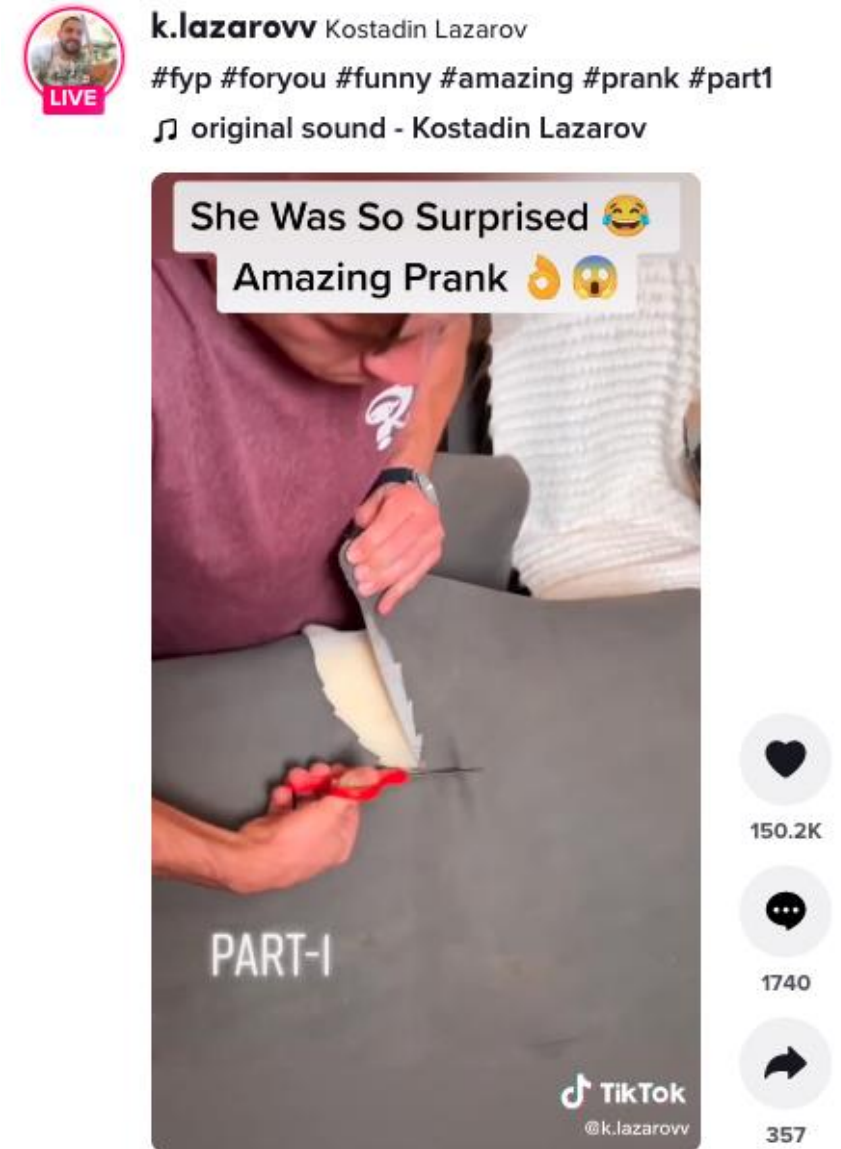

2022: ???

My entry point to teaching the sessions

- Positionality.
- Feeling old.
- Not 'getting' Tiktok. And I still don't.

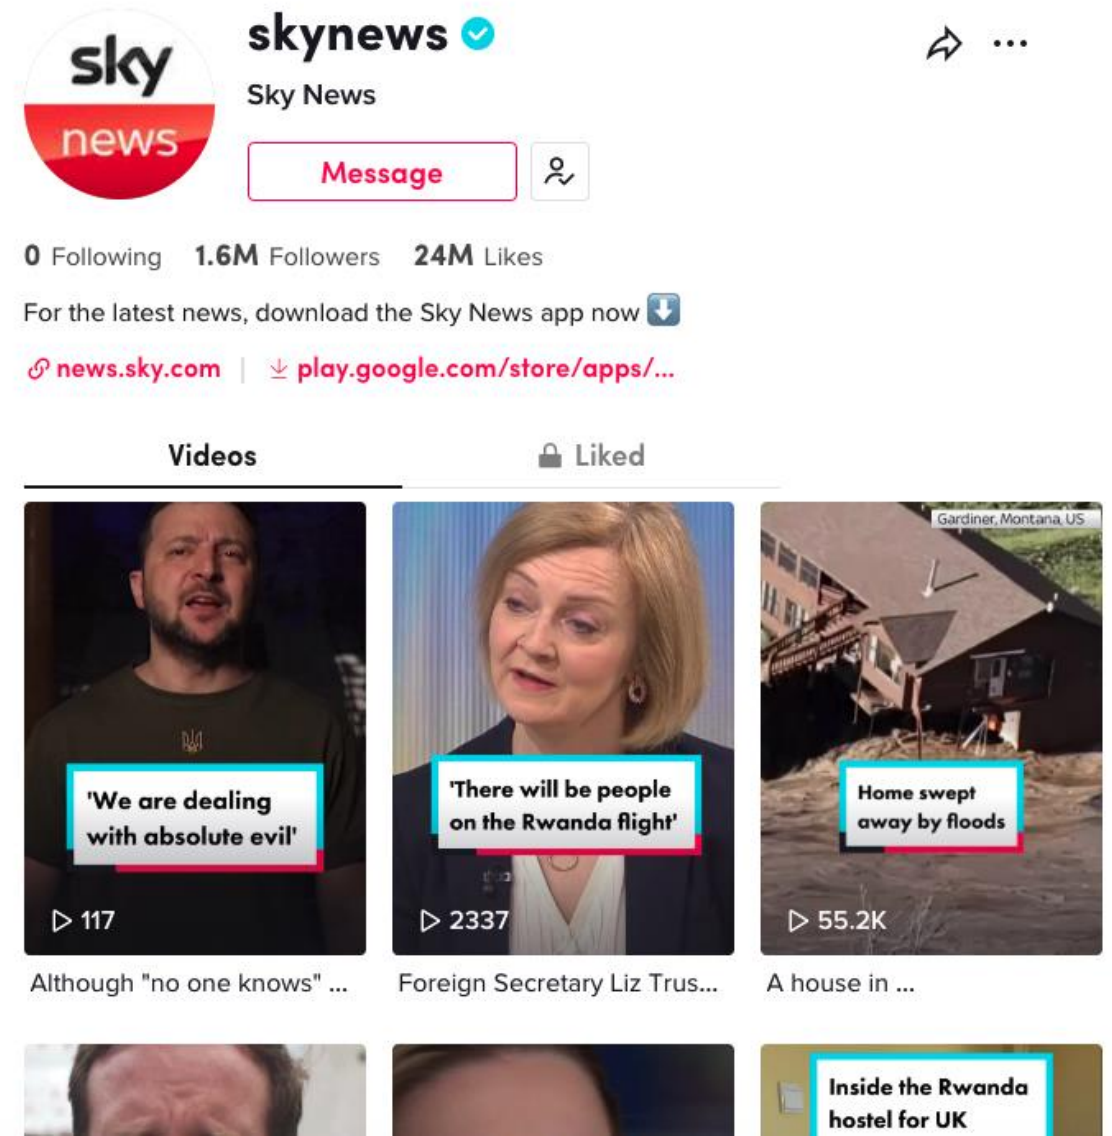

- Pedagogy of co-learning
 - I know about video editing and journalism standards, but not Tiktok
 - Students know about Tiktok, they are *of* Tiktok... but they don't know how to apply it as journalism. (discussions of age and Snapchat/IG, etc)
- Cognitive constructivism (Piaget, 1971)
students drawing on their experience and understanding of Tiktok.
- Social constructivism (Vygotsky, 1978)
memes / trends of Tiktok discussed in class, peer review of work.
- Ethnographic theory: I am the 'stranger' (Schuetz, 1944) to this world; the participants (students) tell me all about it.

Class discussions

- Defining differences between influencer content and news media. i.e. what makes news 'news'?
- Reframing and experimenting beyond ideas of Tiktok as an everyday 'youth culture' and celebrity platform (Kennedy, 2020)...
- ...using it to engage news audiences (Vázquez-Herrero et al., 2020)

The screenshot shows the Instagram profile for Sky News. The profile picture is a red circle with 'sky news' in white. The name 'skynews' is followed by a blue verification checkmark, and the bio reads 'Sky News'. There are buttons for 'Message' and a user icon. The statistics show 0 Following, 1.6M Followers, and 24M Likes. Below the stats is a link to download the Sky News app. At the bottom, there are video thumbnails with captions and view counts.

Student portfolio task

- To research ‘sequential storytelling’ journalism examples
- And create their own (some created IG or Snapchat stories).
 - To plan it in advance. Storyboarding.
 - To consider what will make this ‘journalism’? Factual, impartial, informative. Style?
 - Story types: interview; explainer; tutorial; profile or factfile; event; collaborative.
 - To incorporate appropriate creative methods, tools, and tropes of Tiktok (e.g. emojis, captions, trending music)
 - To consider how much *they* can / want to be present in the stories.

What we got out of it: students / myself

- Not all students chose to post to Tiktok. Consumers, not creators? Or potential for brand damage?
- Students understanding a familiar platform as being disruptive to the industry, but also alien to those not immersed in its use / culture.
- Platforms as culture, as spaces.
- How we differentiate NEWS media.
- The extent to which professionalism AND amateurism is important in news media / engaging audiences.
- My better understanding of the platform – 164k views!
- Considering how memes, trending songs, etc might be used within the module this year.
